## Bleed valve

### Product description

The bleed valve is installed at the end of a manifold to purge the residual pressure in the line between the cylinders and the manifold itself and for maintenance or replacement of supply lines. The valve is supplied with a gas-specific threaded connector (comburent gas or fuel gas) and it can be connected using the Ø 12 mm weld-on pipe connector.

## Components

The valve body is made of CW617N brass with blue plastic handwheel.

EPDM seal ring.

PTFE anti-extrusion ring.

Protective cap made of RAL 5002, color PA6.

## Product codes

GAS	CODE
COMBURENTS	CV001
FUELS	CV002

## Technical data

CODE	GAS	INLET CONNECTION	DRAIN CONNECTION	WEIGHT
CV001	COMBURENTS	W21,7x1/14" M R	Ø 12 mm weld-on pipe	0,5 kg
CV002	FUELS	W20x1/14" M L	Ø 12 mm weld-on pipe	0,5 kg
