## CO2 preheater

### Product description

The preheater increases the temperature of the incoming gas protecting the pressure regulator from frosting. The heater ensures that the gases are put in circulation at a temperature suitable to their use by eliminating or limiting as much as possible the inconvenience related to excessive gas cooling due to the abrupt expansion. The device has an inlet connection W21.7x1/14" M R and outlet threaded W21.7x1/14" F R with nut.

### Product codes

POWER SUPPLY	POWER	CODE
230 V	150 W	HS082
