Medical gas devices

UNI 9507 socket

Product description

The socket is the final part of the compressed gas distribution system. The user can plug a probe into the socket to use the gas. The socket is gas-specific and various profiles are available depending on the gas being used so it is impossible to swap sockets and probes. The socket is UNI 9507 standard compliant. All materials are oxygen compatible, supplied clean and free of any traces of oil, grease or dust.
